Re: **COVID-19: PUBLIC UPDATE #7**

---

Thank you for your continued attention to our updates throughout this most unusual week. Yesterday, we provided additional detail about home learning plans for students and we committed to providing an additional list of some online resources that may be of interest to you and your child. We recognize that every family will have a unique approach to this time away from school, and that every family will find its own balance of learning, rest and play. Should you wish to provide some time online for your child, and have access to the internet, the following may be of interest to you:

- **Manitoba Education** has early years math games for home. Each game comes with instructions for play as well as any necessary cards/materials that can be printed if needed.  
<https://www.edu.gov.mb.ca/k12/cur/math/games/index.html#home>
- **Scholastic** has created a set of learning opportunities to span 20 days. You choose your grade level (JK-9) and begin your learning. Each day includes choice and a variety of media as well as printed text. Learning opportunities often centre around animals or science/social studies learning themes. <https://classroommagazines.scholastic.com/support/learnathome.html>
- **Storyline Online** has well-known actors reading book selections (K-4) out loud. Most titles have a secondary option below the title to access activity guides for parents. [www.storylineonline.net](http://www.storylineonline.net)
- **Khan Academy** provides interactive math learning (K-12). You will find a menu of possibilities under the *Courses* tab on the far left. <https://www.khanacademy.org/math>
- **PBS Kids for Parents** offers activities and tips you can use to help kids (ages 2-8) play and learn at home.
